SUMMARY

Full Stack Developer intern contributing to **Amealio**, a hospitality SaaS platform spanning **user**, **merchant**, and **admin** applications. Experienced in **React.js**, **Redux / Redux Toolkit**, **Node.js**, **Express.js**, **Feathers.js**, **REST APIs**, **JWT**, and **Socket.io**. Strong in translating **Figma designs** into responsive UI, integrating backend APIs, and collaborating in agile teams.

EXPERIENCE

Intern Developer – Envisionard Ads and Marketing Pvt Ltd (Amealio) Jan 2026 – Present

- Contributed to **Amealio**'s multi-role product ecosystem: consumer web app (**amealio_web_app**), **merchant dashboard**, and **super-admin dashboard**.
- Translated **Figma designs** into responsive React UI components; worked closely with backend developers to integrate REST API data and align frontend behavior with API contracts.
- **User app**: Enhanced consumer-facing flows including home, restaurant discovery, menu/ordering, seating, experiences, and profile screens using **React 18**, **Redux Toolkit**, **React Router v6**, and **MUI**.
- **Merchant dashboard**: Contributed to vendor modules for seating, orders, experiences, settlements, and onboarding using **React**, **Redux Thunk**, reusable components, and **Formik/Yup** validation.
- **Admin dashboard**: Enhanced super-admin features including settlements, wallet transactions, category/icon management, and operational reports using **classic Redux**, actions/reducers, and role-based routing.
- Worked with **Node.js**, **Express.js**, and **Feathers.js** for backend API integration, **JWT** authentication flows, and real-time updates using **Socket.io** in coordination with the backend team.
- Integrated authenticated API requests with **axios** and **JWT**; supported real-time features through **Feathers.js** and **Socket.io** across dev/QA/UAT environments.
- Used **Git/GitHub** for version control and pull requests, **Jira** for task tracking, and participated in debugging, UI fixes, and code reviews.

Java Full Stack Developer – Websoft Technologies Feb 2025 – Dec 2025

- Completed hands-on training in **Java**, **Spring Boot**, **React.js**, **Oracle/MySQL**, **JWT**, role-based access, and responsive UI with **Tailwind CSS**.
- Practiced REST API development, client-server integration, and debugging using **Postman**, **Maven**, **Git**, and **Linux** basics.
- Applied modular architecture and clean code practices for maintainable full-stack development.

KEY WORK – AMEALIO PLATFORM

amealio_web_app – User Application | React 18, Redux Toolkit, MUI 2026

- Contributed to a modern consumer web application covering food ordering, seating, experiences, restaurant details, and user profile flows.
- Worked with **Redux Toolkit** slices, **redux-persist**, protected routes, and API hooks to connect UI with backend data.
- Implemented UI enhancements from design specs with reusable components and route-based screen updates.

Amealio Dashboard MVP – Merchant & Admin | React, Redux, Node.js, Express, Feathers.js 2026

- Contributed to a large React dashboard used by restaurant vendors and super admins for day-to-day operations.
- Enhanced merchant flows: seating, orders, experiences, reports, and vendor onboarding.
- Enhanced admin flows: settlements, donations, wallet transactions, activity reports, and vendor management screens.
- Integrated Redux state management (**connect**, **mapStateToProps**, **thunks**) with **Node.js/Express/Feathers** REST APIs and shared loader/error handling.

SKILLS

Languages: Java, JavaScript, HTML, CSS, SQL
Frontend: React.js, Redux, Redux Toolkit, Redux Thunk, React Hooks, React Router, Bootstrap, Material-UI, Tailwind CSS, Formik, Yup
Backend & APIs: Node.js, Express.js, Feathers.js, Socket.io, Spring Boot, REST APIs, JWT, axios
Design & Collaboration: Figma, UI implementation from design, cross-functional work with backend developers
Databases: Oracle, MySQL
Testing & Tools: Playwright, Postman, Git, GitHub, Maven, Jira, VS Code, env-cmd, Browser DevTools, Linux (Basics)

EDUCATION

Avanthi Institute of Engineering <i>MCA - Master of Computer Applications</i>	2025 – 2027 <i>Hyderabad, India</i>
University College of Science, Saifabad, Osmania University <i>BCA - Bachelor of Computer Applications - 85%</i>	2022 – 2025 <i>Hyderabad, India</i>
Narayana Junior College <i>Intermediate - MPC - 78%</i>	2020 – 2022 <i>Hyderabad, India</i>
Ravindra Bharathi School <i>SSC - Secondary School Certificate - 9.5 CGPA</i>	2018 – 2020 <i>Hyderabad, India</i>

PROJECTS

Gemini Chat Application React.js, Spring Boot, Google Gemini API – Developed an AI chat application integrating Google Gemini API for real-time responses. – Built React frontend and Spring Boot REST backend with CORS and centralized error handling.	2025
Awreate – Contact and Email Automation System Spring Boot, JavaMailSender – Created responsive frontend and backend workflow for contact submissions and automated email notifications.	2025
Retro Industries Web Platform Java, Spring Boot, REST APIs – Developed full-stack web platform with modular REST APIs and responsive UI.	2025
